## WORK EXPERIENCE

### Software Engineer III People Interactive (Shaadi.com)

02/2022 - Present

Mumbai, IN

#### Achievements/Tasks

- I am a Full Stack Developer contributing to the development and enhancement of an in-house Marketing Automation Platform, the driving force behind Shaadi.com campaigns. In this role, I take on a multifaceted approach, handling both front-end and back-end development to ensure the platform's effectiveness.
- Designed features facilitating easy association and streamlined management of modules (campaigns, segments, templates), improving user workflow and promoting a clutter-free environment.
- Tech Stack: React JS, Node JS, PHP, AWS Kinesis, AWS Lambda.

### Digital Specialist Engineer Infosys

01/2021 - 01/2022

Pune, IN

#### Achievements/Tasks

- Worked as an ETL Developer.
- Developed Azure pipelines and migrated data transformation logic from SSIS into DBT.
- Tech Stack: Azure Data Factory, Azure Synapse, DBT.

## PERSONAL PROJECTS

### Leafy Café [🔗](#)

- This is a website for 'Leafy Cafe', a multi-chain vegan restaurant. Customers can view the restaurant's menu, location, and contact details.
- Tech Stack: HTML, CSS, JavaScript.

### BMI Tracker [🔗](#)

- A Progressive Web Application where users can calculate and keep track of their BMI.
- Features: Installable | Works offline | Responsive.
- Tech Stack: React JS, CSS (styled-components)

### Smart Dashboard

- A web application where users can customize their personal dashboard to increase their productivity.
- Features: Newsfeed, Calendar, Weather Information, To-do-List, Notes, Count-downs, and many more.
- Tech Stack: React JS, Mongo DB, Express JS, Node JS, CSS.

### Gradient-Generator [🔗](#)

- This website helps developers to generate Gradients Background.
- Tech Stack: HTML, CSS, JavaScript.
